

Tammy Tip #9

Silica Gel Packets

We have all gotten these silly silica gel packet with items that we have purchased. I have gotten them with shoes, electronics and purses. Break all the rules and don't throw them away. I have placed them in the plastic sleeves that I store my Tammy family clothing in. This keeps out the moisture and seems to keep the colors bright. You can even store your clothes in a zip lock bag with the silica packet. If you have small children I do not recommend you use these in you collection.
